Architects	Engineers
Policy-makers	Consultants
Landlords (social and private)	Energy Managers

LOW CARBON HOMES SEEKS TO ADDRESS 5 KEY CHALLENGES

- 1 **Change: apathy and resistance to change**
– key influencers are unmotivated to recommend change; easier to “do nothing”
- 2 **Cost perceptions:** unconvincing ROI
- 3 **Confusing/conflicting information:** competing advice from “experts”
- 4 **Complexity: technological complications** – pace of innovation difficult to keep up with
- 5 **Consistency: inconsistent government policies**
– financial incentives reducing with fluctuating priorities

ABOUT

Low Carbon Homes is accelerating the UK's transition to our low carbon future - focusing minds on improving the energy efficiency of domestic property.

“Low Carbon Dorset looks forward to hosting Low Carbon Homes South West Forum in March. As part of the programme's drive to reduce carbon emissions in Dorset, this event will help to showcase innovative local projects, and highlight the support available to get low carbon technologies on the ground.” **Antony Littlechild, Programme Manager, Low Carbon Dorset**
